IMPORTANT NOTE:

As we prepare for our upcoming hollow tining process, we will be treating the areas where Kikuyu grass has crept onto the greens over the next few weeks. This treatment may cause some discoloration in these areas, but rest assured, the puttable surface will remain unaffected.

Please note that there is nothing wrong with the greens; this is simply part of our ongoing efforts to maintain their quality. The process we are following will eliminate the Kikuyu grass and ensure that these areas are eventually filled with bent grass, enhancing the overall quality of our greens.

Additionally, deep rings are being cut regularly into the soil around the greens edges to prevent any further encroachment of Kikuyu grass. We kindly ask for your patience and understanding during this process.

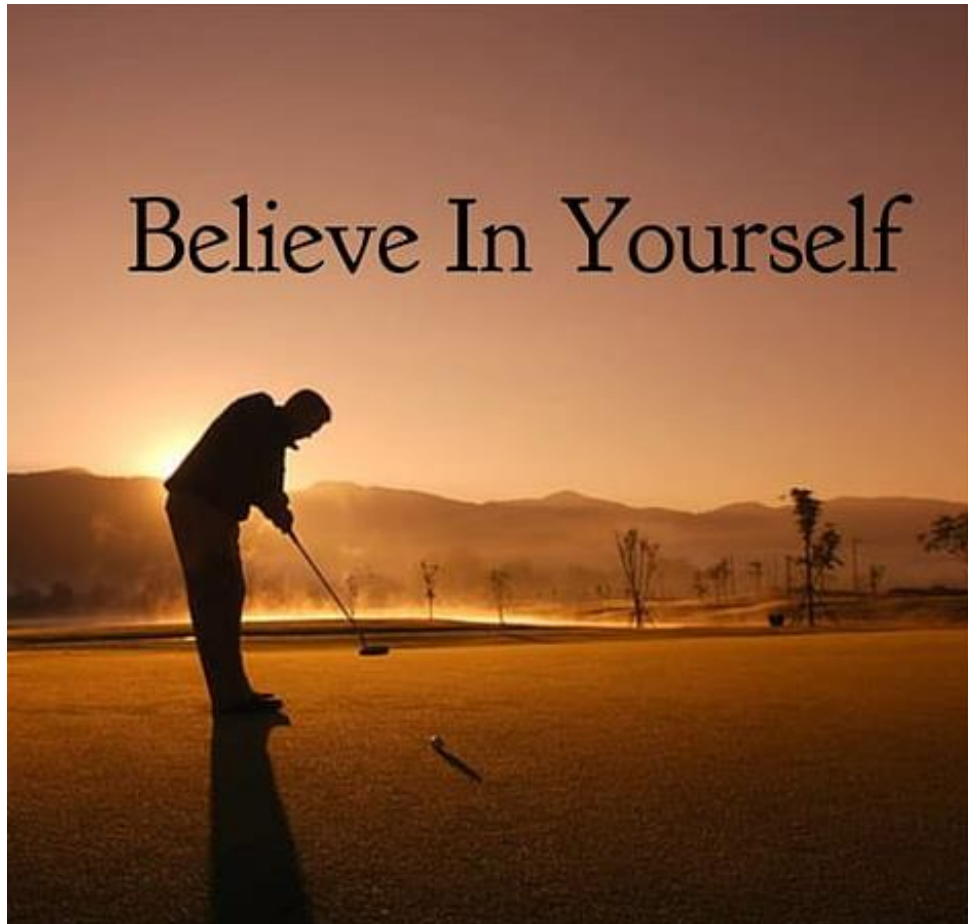

Thank you for your continued support and cooperation.

Just joking...

Do you know why there are 18 holes on a golf course? Because that's how long it took the Scott's who invented the game to finish their bottle of whiskey!

And finally...

**Please Remember to Fill YOUR Divots & Repair YOUR Pitch Marks!
ALWAYS CARRY A SANDBAG / BOTTLE & MAKE SURE IT IS REGULARLY FILLED UP.**

Yours in Golf!
